## About

I'm a qualitative UX researcher with 19 years of experience spanning consumer packaged goods, fintech, cloud computing, and the creator economy. I pride myself on my ability to dive deep into complex domains and become a subject-matter expert. I excel in understanding user goals, mapping journeys, and building archetypes that bring those insights to life. Increasingly, I bring a builder's mindset to research. I'm passionate about using AI tools and lightweight code to design studies, engineer data pipelines, and prototype interactive outputs that accelerate insight delivery. If there's a faster path to an answer, I'll build it. I am a Research-oriented builder and strategist.

## Work Experience

**Senior UX Researcher, YouTube** | Aug 2022 – Present Research Lead and advocate for Creators in the YouTube Partner Program, a cornerstone of the multi-billion dollar creator economy.

- Engineered a custom research data pipeline using AI agents (Google Antigravity) to pull and clean data via the Qualtrics API, then scaffolded an interactive React/Tailwind sentiment dashboard, compressing a multi-day reporting process into hours.
- Built and maintain a longitudinal satisfaction tracking system. Used AI to write SQL scripts that joined data across multiple internal tables into a unified dataset, then leveraged AI to navigate complex internal dashboarding tools to build a live UI, enabling continuous pre/post measurement of product changes over time.
- Leading foundational research to understand creator needs and motivations around monetization, navigating the path to becoming a successful creator, and building a sustainable creative business.
- Driving product strategy by identifying key user journeys and pain points within the Creator Lifecycle, influencing product development to enhance creator experience and success.
- Establishing a UX Research "Think Tank" focused on critical business challenges, generating and synthesizing insights that informed company-level strategy across YouTube.
- Mentor and coach to junior UX Researchers, fostering development across Alphabet.

**Senior UX Researcher, Google Cloud** | Oct 2017 – Jun 2022 Research Lead for Google Cloud Build, a Leader in Cloud-Native Continuous Integration Tools.

- Led foundational research to better understand developer workflows and DevOps tooling.
- Elevated product excellence and the importance of user journeys in order to help bridge cross-product strategy.
- Created research programs and processes that scaled to support multiple stakeholders across several CI/CD products.

**Senior UX Researcher, Fidelity Investments** | Jan 2014 – Nov 2017 Research Lead on Fidelity's award-winning online brokerage platforms.

- Led research to better understand the process of investing across Fidelity's online brokerage platforms including Fidelity.com and Active Trader Pro.
- Managed stakeholders across roles and business units and galvanized them into focusing on needs-based product changes rooted in research findings.
- Advocated for User Experience research across business units and within the UX Design group.

**Senior Project Developer, Nielsen** | Oct 2006 – Dec 2013 Project management, survey design, and consumer behavior research for high-profile CPG clients.

## Tools & Technical Skills

**AI & Development** Claude (Cowork, Code, Design), Cursor AI, Google Antigravity, Gemini API & AI Studio, ChatGPT, Lovable.AI, React, Tailwind CSS, Vite, TypeScript, Supabase, Firebase

**Research Methods** Qualitative Interviewing, Foundational & Generative Research, Journey Mapping, Archetype Development, Concept Testing, Survey Design, In-Product Intercept Instrumentation, Longitudinal Tracking & Dashboard Development, Pre/Post Study Design, Mixed-Methods Studies, Qualtrics (including API integration)

## Education

**Bentley University**, McCallum Graduate School of Business | 2009–2013 Dual Masters Graduate

- Master of Science in Human Factors in Information Design
- MBA, Management in Creativity & Innovation

**Bucknell University** | 2002–2006 Dual Major Graduate

- BA, Psychology
- BA, Economics
